Education

Mapua Malayan Colleges

Cabuyao, Laguna

Bachelor of Science in Information Technology

2022 – 2026

Capstone: Designed a fun, reward-based system that turned paper volunteer logs into a digital experience, encouraging more students to join school volunteer activities.

Relevant Coursework: Web Development (Front-end & Back end), Database Management, System Administration, UI/UX Design, Cybersecurity.

University of Perpetual Help System

Binan, Laguna

Senior High Graduate

Experience

Technical Projects

- Built a Twitter-like interface with reusable components and live state management.
- Created a simple IoT control panel for remote hardware with clear feedback and easy use.
- Made a POS menu system that tracks items in real time and logs transactions accurately.
- Wrote a choose-your-own-adventure style story engine in Python using condition checks and saved user choices.
- Designed a clean database layout for a retail system to keep inventory data organized and fast to access.
- Planned the full setup for a library management portal using basic flowcharts and notes before coding.

UI/UX Design & Prototyping

- Designed a food delivery app in Figma from start to finish, focusing on smooth user flow.
- Created a simple dashboard for a trucking company to help drivers and managers see what's happening immediately.

Network & Cybersecurity Lab

- Used Kali Linux to run basic security tests on fake school networks.
- Built safe network setups in Cisco Packet Tracer and practiced blocking unauthorized access.

Skills & Interests

Technical: Python, SQL (Creation/Queries), HTML, CSS, React, Figma, Linux (Kali Linux), Cisco Packet Tracer, Flowcharting. **Language:** English (Fluent), Filipino (Native).

Interests: Ethical Hacking, System Administration, Cisco Networking
